This 41-year-old man was Grade III on the Norwood Hamilton Scale of baldness when he came to us for his hair transplantation procedure. We gave him 2712 grafts in the frontal zone for his procedure with adequate density and coverage. By the 6th month, he has a complete change in look. He will continue to experience an increase in density until the 12th month. He is regular with finasteride and had been taking the medication for 20 years now.
