Insbesondere:

In vitro modulation of steroidogenesis and gene expression by melatonin: a study with porcine antral follicles.

[http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?cmd=Retrieve&amdb=pubmed&dopt=Abstract&list\\_uids=14682469&q\\_ery\\_hl=6&itool=pubmed\\_docsum](http://www.ncbi.nlm.nih.gov/entrez/query.fcgi?cmd=Retrieve&amdb=pubmed&dopt=Abstract&list_uids=14682469&q_ery_hl=6&itool=pubmed_docsum)

"Our results indicate that melatonin modulates ovarian theca cell steroidogenesis at the molecular level and this modulation may be mediated by its effects on the transcriptional activity of the steroidogenic enzymes."

Die meinen keine hair follicle.
