Was es alles gibt... und dann noch in Rubriken ankreuzbar. Ein Wunder, dass bei Appearance nicht noch "lack of hair" steht....

Zitat:Negative perceptions can damage our relationship with friends and colleagues. It is naturally difficult to separate the message from the messenger.

Our aim is to make the recipient focus on the message, rather than the messenger, and to allow any relationship to remain intact. Messages should be aimed at refining people and ultimately creating better relationships and a better world.

Care to Say will send an eMail to the intended recipient with the message body containing up to 4 traits that you choose from the list of categories on the left side of the screen. You can also modify the message body to elaborate on any of the traits that you believe they can improve on. The recipient will be sent an anonymous eMail and be provided with a link, directing them to a page with the message that you have submitted. At the bottom of the page, there will be some links that they can follow for tips on how to improve themselves, based on the traits you have selected. If you include a reply eMail address in the original message, the recipient can reply to your message. It is important that you enter the correct eMail address for the intended recipient to ensure that your message is read. You can track the status by recording the tracking number or you can enter your eMail address and receive an eMail with a link to see if your message has been read.

In diesem Sinne - lieber ein offenes Wort als sowas!
