Hi,

My german is not good. So, I am writing in english. Please excuse.

I was losing my hairs since 4 years, I tried different solutions except Fin, the solutions that I tried didn't work out. So, I decided to go for HT.

I went to Hamburg FUE, The consultation was kind of Ok. I couldn't meet the doctor and moreover when i search in this forum, I didn't find anyone done HT in Hamburg.

Then I keep on reading this forum, then I found out about Dr Mwamba. Some of them wrote their success.

Last week I was in Brüssel and consulted with Dr Mwamba.

He suggested to me, HT(FIT) for around 2200 grafts for the complete (front and back). I told him that I wanted to have in the front since my budget is restricted, then he suggested to do it with around 1700 grafts (only front).

I am waiting for the dates from Dr Mwamba.

Any suggestions, please welcome..

before HT
to do and don't do

After HT
1.to do and don't do
2.how long it takes the scars to disappear?
3.expected time for results around 3-6 months?
