Repair Journey

Notes

- (1) Immediate drop off of happiness as results are poor from the start, bad customer service and doubts immediately.
- (2) Key stage in the journey as you realise you are not alone in this, you do have options and people to help.
- (3) NB not all US/Canadian clinics can provide excellent results – research, research, research.
- (4) This is the period immediately after surgery until the grafts have shed.
- (5) This is the period after the grafts have shed until your new hair has grown in (tends to be because there will be your old UK grafts may now be showing again, your new grafts have gone and the doubts from your previous experience).
- (6) This may not be a straight line as the growth will come in waves and therefore there may be peaks and troughs. There will be good growth but also the realisation that there may be opportunities for a 2nd pass.
