First of all greetings to this forum as it has been very helpful for me in my research for possible HT for last few months even though I don't speak Dutch (but google translator has been of assistance). As I don't speak Dutch, unfortunately, so I hope the forum would let me write up in English and I'll also be able to collect some valuable (life-saving) information.

I've been looking to have HT for the last couple of years and been researching actively and at times passively. According to my research, the most sought out HT clinics in Europe are in Belgium for hair transplant. Having collected all the possible information online I had a trip to Brussels couple of months ago to have face to face consultation with all the possible options in Belgium. Long story short, having met few of the doctors face to face, I have trimmed down my options to 2 doctors: Dr. Feriduni and Dr. Devroye.

Now, the problem is that I can't decide between the two. Therefore I am turning to this forum and would be really grateful if someone can give me some feedback and real life experiences of those clinics, so that I can finally make the decision where to go. Any links to thread which have discussed the above doctors, would also be useful.

Just a background of my situation: I'm about NW 4-5, According to the feedback from consultations (both online and face to face), I need about 5000-6000 grafts which could be accomplished in 2 surgeries using FUE. I have found consensus among clinics that I have good donor and that many grafts are available.

Really looking forward to collecting feedback.

Thanks!!

I can see that this post has been seen by number of people but no response

Anyhow, if you don't feel comfortable writing in English, please free to write in German, I'll somehow translate them. But I would highly appreciate your responses on the question I have posted.

Thanks a lot in advance!

Hello,

I would say Dr Feriduni is the better one, because we have a got a few results from him here in the forum. That is just my opinion. I have never heard anything about Dr Devroye, maybe he is better that Feriduni, but we haven't got any results and we can say anything about him without results.

Regards

Thanks a lot Fin for taking the time to give valuable information. Could you provide some links of Feriduni's results? Especially if they are published by patients themselves.

Btw, has anyone noticed who have provided negative feedback about Feriduni (or Dr. Devroye) for that matter?

Who other doctor do you think should be considered for FUE in Europe?

Cheers!!

You are welcome,

I suppose that we have got one result in this forum about Feriduni. Please look at the results, the part of the forum is called: "Erfahrungsberichte und Ergebnisse" which has got the results from a few doctors and Feriduni. You can find it on the first big site of this forum.

I just can say my opinion. I looked also for a long time for the right doctor and I in my opinion are the best FUE Doctors, Dr. Keser from Turkey and Dr Azar from Germany.

I have seen a lot of very good results from Dr Keser, you can find them here in the forum and I saw a very good result from Dr Azar.

Have a look at the results and then choose the right one, but If you want, you can ask us here and we will help you.

I think a lot of users would help you but they are not able to speak English, that is the reason why

nobody answered.

edit

I have found the right topic with Dr Feriduni's work.

But I haven't understood whether you are looking for FUT or FUE?

I think that Feriduni makes just FUT, maybe I am wrong.

Fin schrieb am Fri, 12 August 2011 00:47But I

I think that Feriduni make just FUT, maybe I am wrong.

No, he makes both...here a nice example for FUE:

[http://www.hairlossexperiences.com/view\\_topic.php?id=1089&forum\\_id=4](http://www.hairlossexperiences.com/view_topic.php?id=1089&forum_id=4)

but i think he makes mostly FUT. And if I had the choice between FUT and FUE with Dr. Ferudini i would decide FUT...because of the constantly good results.

But why did you choose Feriduni? There are a few docs that are so much better than him.

If I were you I would change another doc.

Cheers

Hello,

please have a look at the part of the forum "Erfahrungsberichte und Ergebnisse"

There are so many results of different doctors. The best doctor is in my opinion Dr. Keser from Turkey. All of his results are very good and they look wonderful.

But it is your decision, Dr Feriduni is also a good doctor, but I think he is not as good as Keser.

Regards
