

Storage Instructions...

- A. Keep bottle out of light when not in use to prevent discoloration.
- B. Keep bottle tightly capped when not in use.
- C. To avoid cap from becoming sealed to bottle after using, be sure there is no liquid polyurethane on the neck when closing.

Repair Instructions...

- A. Clean and dry the area of the polyurethane base to be repaired.
- B. Apply the clear repair tape to damaged area. (Use special tape enclosed; *do not use this tape for anything else.*)
- C. Brush a **VERY THIN** coat of liquid polyurethane over the clear tape and blend into surrounding polyurethane of the base using the brush.
- D. Dry immediately with low heat of hair dryer or let dry naturally overnight for best results.

Re-enforcement for clips, fusion, etc....

- A. Using the pre-coated monofilament enclosed, sew clip (or hook, etc.) to a small piece.
- B. Apply liquid polyurethane to other side and to the area on the base where clip is to be attached.
- C. Stick together and let dry naturally overnight.

To make tape pads on monofilament base...

- A. Apply a thin coat of liquid polyurethane where tape pad is desired.
- B. Dry immediately with low heat of hair dryer or let dry naturally overnight for best results.
