Dr Zierig :

"Sorry for my absence but this is the latest "official word" on Histogen.

We're starting to recruit first week in June in Singapore, total of 50 pts. As a reminder each patient gets 8 injections of control and HSC anterior and posterior. The posterior gets a second set of 8 injections at week 6.

There has been limited case studies going on in Japan but they have been hampered by all the events there.

Unfortunately this stuff happens very slowly(which equally dissappoints and frustrates me ) and everyone has to be very careful with what they say and report because there are many people hanging on to every word. I know that many of my colleagues are searching for solutions and I am confident that we will bring help and hope to many hairloss sufferers but we have to be patient or we derail these projects before that really get going .

I cant respond to this thread daily but I assure you I will update you and Spencer with any new worthwhile information that I get.

I thank you all for your support,patience and interest.

Best always

Doc Z "

Tja mittlerweile fängt also schon langsam das gegenseitige Ausspionieren an
