The list of moviestars supposedly wearing a hairpiece goes on and on. We conclude with an overview of big Hollywood names that are rumoured to have wigs or implants. We however have not done any research to support these rumours. So make up your own mind.

Tough cowboy John Wayne, singer-actor Frank Sinatra, action-hero Steve McQueen, Jimmy Stewart, Humphrey Bogart, Fred Astaire, all of these heroes of a glorious past are said to have worn wigs. We all can see they often had funny hairdo's that covered their hairlines, but is that strong evidence? William Shatner, famous for his part of Captain James T. Kirk in Star Trek, is often referred to as a wig wearer. The 73 year old Shatner is denying. Robert de Niro, Nicolas Cage, John Travolta, Mel Gibson, Tom Hanks, Robin Williams, Kevin Costner, Michael Douglas, Harrison Ford, Hugh Jackman, Brendan Fraser, Mike Meyers, Jason Patric, John Cusack, Ethan Hawke, Jon Bon Jovi, Christopher Lee, Christian Slater, Christopher Reeve, Ricardo Montalban, David Spade, Michael Keaton, Sylvester Stallone, Willem Defoe, Charlton Heston, Rob Lowe, Jude Law, Billy Bob Thornton, Kevin Spacey, Robert Redford, Quentin Tarantino, Bronson Pinchot, Steve Martin, Charles Grodin, Chevy Chase, Chuck Norris, Harry Connick Jr, Lee Majors, Charles Bronson, Tony Curtis, Lou Ferrigno, Tom Arnold, James Caan en Billy Crystal, all of these moviestars are rumoured to have implants or hairpieces.
