Hi every one, I'm Mirko Bruscaini from Italy. I'm the owner of the scalp micropigmentation center Dermo Beauty Center in Italy near Milan.

I'd like to share with you this some pictures of this new technique and and answer any questions.

The english name of his technique is scalp micropigmentation, in Italy it's called tricopigmentazione. As technique is similar to the tattoo, but it has substantial differences in equipment and pigments used. In this case we don't use permanent pigments, but we use bioabsorbable pigments.

Unfortunately I do not speak German and I apologize for this
