Apologies for using English language, I am from UK and still learning German.

I have created this account to know about any doctor in Munich who can prescribe me Propecia easily. I don't want any blood tests or thorough investigation of my scalp. Just require a quick prescription to get Finasteride. An English speaking doctor or dermatologist would be preferable. Also can you let me know whether my visit to doctor will be covered by insurance? I have insurance plan with AOK.

I can confirm that the IndPharma pills (Veltride and also Fincar) are fake.

I have been taking 2.5mg Ficar ED + 0.5mg Veltride EOD since Feb 2014 till now.

Continuous hairfall, hairline from NW1.5 to NW3. Crown started balding also.

I take blood test last week and got DHT levels of 67 ng/dL. The normal reference range was 35-85 ng/dL. So I'm on the high end of DHT range. Clearly the IndPharma meds have done nothing to suppress my androgen levels.

Thanks a lot for your time. And please beware of IndPharma crap. Your hair is something not worth saving money with fake Indian generics.
