Hallo zusammen,

Studien haben gezeigt, dass Adenosine eine (mehr als) gute Alternative zu Minox ist:

Adenosine significantly increased the anagen hair growth rate and the thick hair rate

<http://www.ncbi.nlm.nih.gov/pubmed/19239555>

However, the patients were significantly more satisfied with adenosine because of faster prevention of hair loss and appearance of the newly grown hairs.

<http://www.ncbi.nlm.nih.gov/pubmed/24183218>

Adenosine was significantly ($P < 0.05$) superior to niacinamide in terms of global improvement of

thickness by the study participants. No causal adverse event due to the adenosine lotion was observed.

<http://www.ncbi.nlm.nih.gov/pubmed/25925959>

These results indicate that the effect of minoxidil is mediated by adenosine, which triggers intracellular signal transduction via both adenosine A1 and A2 receptors, and that the expression of sulfonylurea receptor 2B in dermal papilla cells might play a role in the production of adenosine.

<http://www.ncbi.nlm.nih.gov/pubmed/11886528>

Hier und in internationalen Foren ist zur Adenosine Anwendung jedoch relativ wenig zu finden. Woran liegt es? Nutzt hier jemand eine 0,75%ige Adenosine Lösung und kann über seine Erfahrung berichten?
