The most asked question : does it look natural ?

We believe it does, as do our clients.

State of the art tricopigmentation can be an excellent solution for those that

Do not want any kind of surgical treatment

Do not want to use hair pieces

Are not good candidates for hair restoration (mostly Norwood 6+7)

Tricopigmentation is a combination of technical skills and art.

Not every patient is the same, and as such we treat every person individually.

This client wanted a very soft approach.

Sabine transformed his request into a perfect example of a soft looking micro hair pigmentation.
