Recht Interessant!

btw: Dein Frontal Shedding kam von Minox und nicht von Dut! @foxi

Zitat:Results. [...] In the frontal region, the dutasteride 0.1, 0.5, and 2.5 mg groups improved significantly more than placebo at both 12 and 24 weeks.

Zitat:The proportion of patients with moderate or greater increases was higher with dutasteride 0.5 and 2.5 mg than with finasteride for both vertex and frontal photographs.
