Dutasteride hat eine HWZ von 35 tage nur wenn man es täglich einnimmt....ansonsten nicht...

und bitte aufmerksam durchlesen....

http://www.lakemedelsverket.se/upload/SPC_PIL/Pdf/enhumspc/Dutasterid%20GlaxoSmithKline%20capsule%20soft%20ENG.pdf

2 besondere aussagen....

At low serum concentrations (less than 3ng/mL), dutasteride is cleared rapidly by both the concentration dependent and concentration independent elimination pathways. Single doses of 5 mg or less showed evidence of rapid clearance and a short half-life of 3 to 9 days. At therapeutic concentrations, following repeat dosing of 0.5 mg/day, the slower, linear elimination pathway is dominating and the half-life is approx. 3-5 weeks.

Effect of daily doses of Dutasterid GlaxoSmithKline on the reduction on DHT is dose dependant and is observed within 1-2 weeks (85% and 90% reduction, respectively).

somit ist dutasteride oral nicht wirklich so der hammer....
