They are an innovative novelty on the world market of hair tonics.

They use ethosomes as a new carrier system, which increases the transport of active substances to the deeper layers of the skin dramatically. Ethosomes are superior to usual hydroalcoholic mixtures (water + alcohol) and also to conventional liposomal products.

In addition, unlike conventional liposomal products, our ethosomal product is liquid and therefore also applicable to haired scalp. Furthermore the product is comparatively cheap.

Also ingredients like cepharanthine and minoxidil sulfate are remarkable.

Nanominox contains less than 30% alcohol and no Propylene Glycol (PG) or PPG, which makes it more skin-friendly than conventional hydroalcoholic minoxidil mixtures, which usually contain about 30%v/v alcohol and 50%v/v Propylene Glycol (PG). Especially PG causes allergies in some people.

Please visit our page and learn more about our new products.

Ordering is possible by PayPal at the moment. Payment by credit card, bank transfer and cash on delivery will be added in November.

Additional new products will be released soon.
