hab hier was gefunden

Zitat:

#### TOPICAL DUTASTERIDE

If you are able to obtain Dutasteride in its raw form, you might even be able to compound your own Dutasteride topical solution. It was reported in Avodart's prescribing information that the medication is absorbed through the skin as well. Dutasteride in its raw form is a white-yellowish powder. It is insoluble in water but can easily be dissolved in ethanol (44mg/mL), methanol (64 mg/mL) and polyethylene glycol 400 (3mg/mL). However, please note that effectiveness of Dutasteride or Avodart as a hair loss treatment has not been clinically established.

was meint ihr? hat jemand ne idee wie ich das hier schaffen soll : "obtain Dutasteride in its raw form" ??

raw form kannst glatt vergessen...schneller kanst alle verbotenen sachen bekommen als duta in raw form.  
kannst es nur mit den pillen machen....aber das kommt ziemlich teuer....  
nimm lieber fin und mache es nach wiki.
