Hallo zusammen,

ich bin durch den Zufall auf folgenden interessanten Thread gestossen in einem anderen Forum, es ist in englisch.

Mich würde die allgemeine Meinung zu dieser Thematik interessieren.

Grüsse

Kellboy

Dr. Nigam antwortete einem User bei Hairsite hinsichtlich Spencer Kobren (sehr interessant!!!) :

"I think Spencer views are reasonable.

Even i would have waited for more case studies and documentation if i was at his place.

Although i am not at bald truth for generating income from spencers endorsement.

Neither are intelligent and knowledgeable members so naive to take decisions on choices available to them.

I was open for the interview as members asked me, are you ready for the same.

As per your post it seems he has burnt his finger ,may be with partial endorsement of ACELL,when he says the members did not get desired results from ACELL(though ACELL had a good website as against mine and an ISHRS presentation...!).

Regarding dr gho,with whom he is partially convinced (with published data and good relationship),i am eager with my critical comments and debate to hear to his replies on the same.

Dr Ziering is the producer of the bald truth show.

He was invited many a times for his work on histogen,i have listened to his interview,in which he never claimed any significant result regarding hair multiplication,

dear spencer i don't think he came to the show just to increase his income with your esteemed

endorsement.

I wonder why Dr WASHNIEK of ADERANS, Costaralis, japanese lead researchers, follica, replicell, phoenixbio biotechs, Dr Gerd, lauster and many other top guys with special interest on cellular hair generation not on your show, though they have a great website and published papers...!

Acell ,who are openly defying FDA,USA, which has never been given any approval on use or claim of acell for hair regeneration(only for wound healing) on your show.

Dear Spencer ,you yourself said 99% hair products in the market are fake or with poor efficacy than even rogaïne and finasteride,and is there much left to discuss about fut,fue.

Only thing to seriously discuss and follow are hair multiplication , hair doubling ,dermal papilla culture and hair germ implants.

Ithought bald truth was about exchanging information,knowledge,new developments, critically exposing the good and bad points of a product or procedure,a platform to invite experts from diverse fields to explore cure of MPB.

But dear Spencer, is more worried about the possibility of some fake guys like me, make money out of his endorsement(as if the members are naive or not prudent to be able to decide on their own) ,

Did i ask for his endorsement,in fact few of the members wanted him to prove me wrong.

Dear Spencer ,you will hear the most exciting developments regarding BALD TRUTH CURE from the people i mentioned above and me in the months to come.

We will hear each other one day...good luck.!

Your forum has helped in my research, i thank you for the same.
