Hallo,

hab da was gefunden und es hat mich so zimelich angemacht

ihr kennt doch sicherlich das wenn man durch die Haare fährt dass es an manchen tagen weh tut, als ob die Haarwurzel krank sind oder so ka wie man das nennt und das Emu Öl soll das beseitigen und noch dht senken, cool gell?

was meint ihr dazu??? man müsste das Zeug nur 1 x pro tag(abends) anwenden stand noch dabei, ich will das mal ab mai testen...

Gruß Alex

"A product of nature dating back thousands of years to Australia where the Aborigines of the outback use it as a natural healing remedy for dermatological and inflammatory disorders. Modern day research shows that emu oil contains two exceptional active ingredients that enable it to be used as an effective topical pharmaceutical. The Linolenic acid inherently contained in the oil provides relief from sore muscles and joint pain while the Oleic acid provides a local anti-inflammatory effect. Emu Oil has been shown to be a 5-alpha-reductase inhibitor that also thickens dermis and enlarges hair follicles in all known alopecia conditions, including androgenetic. Dr Holick of Boston University, found that it "awakened 80% of dormant hair follicles". It has also been shown to stimulate melanogenesis providing potential for the treatment of greying hair as well as hair loss. Emu Oil penetrates the skin better than any cosmetic ingredient known to date, and this is due to its non-phosphorous composition. It can be used by itself, or with any topical hair growth or skin moisturizing compounds, enhancing their effectiveness."
