Another example of a Tricopigmentation treatment.

Whereas hair transplantation is limited in terms of density due to donor supply issues, this is not the case for Tricopigmentation.

Here a good example of a client with advanced hair loss. The donor area was too limited for hair restoration (close to norwood 7).

His results:

Scalp pigmentation is really good alternative to HT.  
But it is very important who you treat.  
I saw very bad results in other forums.  
You should be very careful.

Ich finde das Verfahren einfach nur überflüssig. Ob du jetzt auf der Kopfhaut ein paar dunkle Punkte hast oder nicht, Glatze bleibt Glatze!  
Ist leider so! Aber muß ja jeder selber wissen. ...  
Tschuldigung, daß ich deutsch schreibe.

Hi Matthias,  
Indeed, it takes years of experiences, combined with state of the art equipment that has been designed specifically for head pigmentation.  
We still see many problems comming from tattoo shops or permanent make up artist giving it a go  
....

SMP is NOT your classic permanent make up and tattoo is lightyears away from scalp pigmentation.

But of course, some people will always just go for cheap cheap.

So don't be surprised that if you pay peanuts you get monkeys.

Another example of a realistic approach using Tricopigmentation.
