Patient has had multiple hair transplants using FUT.

Also, large instruments seem to have been used to create the sites.

In order to camouflage the unnatural looking effects from his hair transplants he opted for Tricopigmentation.

misinterpreted

jungs das ist ne MP zur kaschierung ner alten FUT.

nix HT, die haben die plugs(die dicken dunklen punkte auf dem oberkopf) restauriert, und da sieht man schon nen deutlichen unterschied

This is really not typical and not to be expected if you go to a top clinic.

This kind of situation usually is the result of old techniques or new clinics/surgeons that have no idea about the modern solutions available today.
