Hello all!!!

I found in this forum this particular and interesting topic about a "boosted" minoxidil.

<https://www.alopezie.de/fud/index.php/t/26779/>

People were suggesting to use:

60 ml minox

1g avocadin

2g AA

8mL voltaren spray

However I did not find feedback with people who used it? Anyone to tell me if it has a better effect than minoxidil alone?

I would like to try but do you need a prescription from your doctor to get voltaren spray?

Vielen Dank!!

I'm afraid i cannot tell you anything particular about this boosted minoxidil. But what I can tell you is that you won't need a prescription to buy voltaren spray. A bottle of 25g will cost you ~15€ (search for PZN 05730720).
