Hallo, I just have one question,

does anyone know the Maxilene shampoo and lotion?

Does it have any side effects? like shedding? erritation? etc.?

Does it works to try to prevent (at least for some time) alopecia and maintain a healthy hair?

Thanks a lot!

Hey Daniel!

It is controversial if Maxilene works or not.

There was a study, in which Maxilne worked quite good! But like always it is hard to say if you can transfer this findings into reality.

Here is a link:

[http://www.alopezie.de/website/index.php?module=pagemaster&mp;PAGE\\_user\\_op=view\\_page&PAGE\\_id=57&MMN\\_position=59](http://www.alopezie.de/website/index.php?module=pagemaster&mp;PAGE_user_op=view_page&PAGE_id=57&MMN_position=59) :21:38

It is in german, but you can translate it, e.g. with babelfish

[http://de.babelfish.yahoo.com/translate\\_txt](http://de.babelfish.yahoo.com/translate_txt)

I think, Maxilene has no side effects.

So of course you can try Maxilene, but in fact your hair will not appear again. That is what i believe. If you are lucky, you can slow down your alopecia.

In my opinion, the only thing, which are working against alopecia, are finasteride and rogaine.
